The lodge

The present facilities, specially designed to serve and satisfy the taste of the most demanding hunters, were built on the remains of the old stone and wood structure that dates back to 1900. This was done with the intent of preserving the charm and history of the place.

There are suites available in a colonial style including stone, handcrafted bricks and wood, apart from the social area where you will find a large living room with a fireplace, a dining area, an indoor grill, and a wine cellar among other things. There are comfortable suites available, each with its own fireplace and dressing room. And most important of all, every room offers spectacular views of the hills surrounding the main houses.

The house rusticity is contrasted by certain modern touches like electric energy, digital telephony, connection to the internet and satellite television.

In what regards gastronomy, you will have available a menu particularly elaborated by a Chef expert in the preparation of game meats, combined with garden vegetables and other home – made accompaniments.

Pasta, bread and preserves are all handcrafted at the lodge. And since a good meal calls for a good wine, you will be able to select it directly at the cellar, from a wide selection of top – level wines made in Uruguay, Chile and Argentina.

Formalities

MIGRATION

Foreigners are not required any type of special visa to enter Uruguay. All they need to show is a valid passport.

ENTRY OF GUNS / TROPHIES TO BE EXPORTED

At present, entry of rifles into the national territory is allowed only upon an express authorization by the “Service of Weaponry and Supplies”.

The cost of each Firearm License is US\$ 200 and such documents are to be requested 15 days in advance. However, we offer hunters a wide variety of fire arms.

Big Game

You will find excellent trophies of Red Deer, Axis Deer, Fallow Deer, Wild Boars, European Moufflons, Gabon Goats and Angora Goat, all of which have a significant population in the area.

Hunting can be done during day and night. You may choose to go out on foot, in four-wheel drive vehicles, or particularly on horseback, a way that is most recommended as a unique experience. During the day, professional guides will accompany you individually, and take you to every corner of the ranch, where certainly you will find the long-expected trophy.

You can also hunt during nighttime, from comfortable refuges located on strategic places, sharing the night habits of an endless variety of species, what is really an amazing experience.

Hunting season: In Uruguay it is possible to hunt most species throughout the whole year, for the climate and the applicable regulations allow for it. In the case of Red and Fallow Deer, due to the natural cycle of the species, the hunting then is only done from March to August.

It will be our pleasure to assist you in planning your Big Game Hunting trips, and contracting the best services available at the most competitive prices in our market.

Trophy preparation

At the end of the hunt, your trophy will be prepared following your preferences. Trophy fee includes field preparation and preservation; it doesn't include taxidermy, export charges and shipping to final destination.
